

## Technical Training

# Endpoint Encryption

### McAfee Endpoint Encryption (formerly SafeBoot)

The McAfee Endpoint Encryption course has been created to assist security professionals on the road to securing their mobile workforce and sensitive data, and to prevent data loss, unauthorised data access and information leakage from your organisation.

#### Course Objectives

- Introduce encryption and discuss its uses
- Introduce the product
- Highlight the product prerequisites
- Describe its concepts and roles
- Suggest deployment techniques
- Suggest individual Product Policies
- Illustrate its Reporting Capabilities
- Look at scheduling of reports
- Introduce advanced features such as integration with McAfee ePO and active directory synchronization.

- Introduce client recovery and look at disaster recovery.

The training will be interspersed with Scenario's and Labs to facilitate learning.

By the end of the course, candidates will be:-

- familiar with product
- understand which components perform what functions
- be able to deploy the product and create policies as required

**Price:** £985

**Duration:** 2 Days
