

Technical Training

McAfee - ePO4 Introduction and Upgrade

Course Objectives

The one day ePO 4.0 upgrade course has been designed to give existing ePO Administrators a hands on experience of the upgrade process from ePO 3.6.x and an insight into the new features

- Installation prerequisites
- The upgrade process and what is entailed
- Introduction to the new ePO server
- Ensuring ePO 3.6.x information has been retained
- How to manage and deploy new applications
- How to configure the new System Tree
- Configuration of tag criteria and system tree sorting
- Configuration of full active directory and NT domain synchronization
- Introduction to the new reporting section and creating your own reports
- Scheduling and e-mailing reports
- Configuration of the system compliance tasks
- Configuration of new users and permissions
- Configuration of the dashboards

Protect Your Investment

Investment in network management and skilled personnel is vital to the ongoing support of any organisation. Redstone can help you to maximise and protect the investment you have made by training your support personnel to a level that will allow you to get the best out of your Anti-virus strategy.

Aim

The one day Anti-virus training course has been designed and written by certified Redstone engineers to give a hands-on introduction to the complete Anti-virus solution provided by McAfee, protecting all vulnerable points of the network from virus attack. The course intends to give the knowledge required to design and manage an Anti-virus strategy with minimum impact on other aspects of the organisation.

Price: £595

Duration: 1 Day

About Redstone Managed Solutions

Redstone Managed Solutions has over 10 years experience of providing IT Infrastructure and Internet Solutions.
